# The Tyler Statesman

Morris Appointed Interim

## Turney Resigns Position At TSC

By RICHARD NEELY

Dr. Bill Turney has resigned his post as vice president for academic affairs at Tyler State College.

The surprise move was accepted by the TSC Board of Regents in a special meeting on campus Feb. 5.

A resolution recognizing the contributions of Dr. Turney in the "rapid growth of the college" and his contributions to academic literature was passed by the regents.

Dr. Turney's resignation will be effective on Feb. 28. The vice president said, "My reasons for tendering this resignation are based on my desire to accept a position at another institution." An announcement will be made by the other institution at a later date.

### First of Three

Dr. Turney was one of the first three administrators to join the TSC staff and has been here since 1972. Other colleges he has been at include North Texas State University, Texas Christian University, Canal Zone College, McNeese State College and Northeastern State College.

He also said, "Even though there will be a few months intervening time between positions, I have been attempting to complete two book manuscripts before the publisher's deadlines are reached."

He also has a heavy schedule of professional speaking engagements across the nation which he says "will be a drain on my time and energy."

Challenging, exciting and rewarding is how he described his association with TSC. He commented that he was confident that it will continue its development and become one of the most academically respected institutions in the state of Texas.

Dr. James Stewart, president of TSC, said upon receipt of Turney's resignation, "I acknowledged to Dr. Turney my personal gratitude and that of the Board of Regents and the entire institution for the professional service that he has rendered to Tyler State during his tenure."

### Morris Named

During President's Hour on Feb. 6, Dr. Stewart named Dr. Gerald Morris as interim vice president. He will be serving an

undetermined length of time.

Dr. Morris is currently chairman of the Department of Mathematics. He joined the TSC staff in January of 1973, the first semester of classes.

President Stewart said of Dr. Morris, "his professional background makes him uniquely qualified for this interim position. Gerald has been the type of individual who has always been willing to give maximum effort, both personally and professionally, in behalf of TSC."

Dr. Morris will be working with faculty and administration in coordinating and assisting in various academic activities. During this interim period he will remain chairman of the Department of Mathematics and will continue his teaching role.

He has also served approximately one and a half years representing the School of Sciences and Mathematics on the Dean's Council and the Administrative Council, and was a member of the steering committee of the past Self-Study Report for the Southern Association of Colleges and Schools.

### Permanent

Dr. Stewart said that a permanent vice president for academic affairs will be named at the earliest possible date.

Other business covered at the special meeting included reports from Dr. Stewart on Phase I construction, spring semester enrollment and instructor pay hikes.

He reported that enrollment has increased 26.76 per cent over the fall registration. The final enrollment figure for spring has been set at 1,108 students.

### Pay Raise

Dr. Stewart said that the money for the teacher pay raise will be appropriated to the school in a supplemental appropriation by the legislature. The raise will range from 13 per cent for those making less than \$876 per month to \$174 per month for those making over \$1,935 per month.

In a report on Phase I construction, Bob Grubbs, director of the physical plant and resident engineer, said that progress can now be seen with some of the structures. He also said that the sewer lines to tie in with the city's have been installed and covered up.

GROUNDBREAKING ceremonies were conducted on Jan. 29. Participating in the activities (l to r) were Watson W. Wise, a member of the Coordinating Board, Texas College and University Sys-

tem, Regent H. J. McKenzie, president emeritus, and Regent B. H. McVicker, M.D., chairman of the TSC Board of Regents.

## Groundbreaking Ceremony Completed At TSC Jan. 29

One of the most significant events in the history of Tyler State College took place on Jan. 29 as the official groundbreaking for Phase I construction was held at the new permanent campus site. Actual construction on the new \$7.7 million campus facilities began last September.

The ceremony--held at 2 p.m. at Spur 248 and Omen Road--was presided over by TSC President Dr. James H. Stewart Jr. and about 500 persons heard an address by Dr. Bevington A. Reed, featured speaker at the program.

### Dr. Reed

In his address Dr. Reed, commissioner of higher education, Coordinating Board, Texas College and University System, said

that such groundbreakings are as old as the history of America itself. Our ancestors, he said, "... were determined even then... to have leaders who were educated in America--in North America--and to have leaders who had been educated with particularly American ideals and American traits of character."

In addition, said Dr. Reed, behind the log cabin schools that were established throughout the Southwest since then "was a rich heritage of learning, of intellectual curiosity and of concern for humanity." And the impact of the existence of those colleges still is being felt in our lives today.

But circumstances today are different. Said Dr. Reed, "The boundaries of our knowledges have expanded far beyond those

of our ancestors..." and what we learn in college today quickly becomes obsolete.

"A thousand new professions, a multitude of new occupations demand an ever-increasing supply of educated workers," said Dr. Reed, who also said there is an urgent demand for leaders.

### Changes

With these changes--as well as changes in attitude regarding who should go to college--and with over half of today's students attending school part-time, Dr. Reed viewed the groundbreaking as a gateway "from the past, through the present and into the future" for an institution that would be more responsive to the needs of the people than were those of the past.

Dr. Reed was introduced by the Honorable Watson W. Wise of Tyler, also of the Coordinating Board, Texas College and University System.

There also were remarks by Dr. B. H. McVicker, chairman of the TSC board of regents, and J. Paxton Hart, president of the faculty senate at TSC.

Glenn D. Phillips, president of the Student Government Association, delivered the invocation.

Participating in the actual groundbreaking were Dr. Stewart, Dr. Reed, Wise, State Reps. Bill Clark and Joe Hubenak, Dr. McVicker, and TSC regents David K. McKie, H. J. McKenzie, Dean W. Turner, C. Quentin Abernathy, Neal E. Velvin and Jeff Austin Jr.

During the program, Dr. Stewart read letters of congratulations from Gov. and Mrs. Dolph Briscoe, State Sen. Peyton McKnight and Lt. Gov. Bill Hobby, all of whom were unable to attend.

### Dignitaries

Among those attending the ceremony--and recognized by Dr. Stewart--were the Smith County Commissioners Court, Tyler city officials, including Mayor Baker Lucas and City Manager Ed Waggoner, and area community and junior college presidents.

In addition, Dr. Stewart introduced members of the TSC Educational Foundation, representatives of the contracting and architectural firms involved in the campus construction, as well as the TSC board of regents and a number of TSC students and faculty attending the ceremony.

## Commencement Set For TSC, May 17

Commencement is scheduled for May 17; but for students who will be graduating this spring, the time to begin preparation is now.

So says Dr. O. Robert Marsh, dean of Admissions and Records. And according to Dr. Marsh, the deadline for filing the Graduation Evaluation Form is March 14.

The amount of time needed to process the necessary paperwork makes it imperative that all graduating students meet this deadline.

As soon as possible, the student should meet with his advisor to complete the Graduation Evaluation Form, which is prepared by the department.

The advisor already will have the student's Admission Evaluation and copies of the student's grade reports and, upon request to the Office of Admissions and Records, may get a copy of the Student's Academic Record.

All the hours a student has completed at the upper-division level and wishes to use for graduation purposes should be listed on the Graduation Evaluation Form, and must total a minimum of 60 semester hours.

The information will be listed in columns and include the course number, course title, the school where the credit was earned, as well as the credit and grade.

Specified on the bottom should

be the type of degree to be awarded and the signatures of both the department head and the dean.

The student should then hand carry the form or a Certificate of Completion to the Business Office where he will present the material with the \$15 graduation fee, after which the form will be forwarded to the Office of Admissions and Records for processing.

And until the graduation fee is paid, warns Dr. Marsh, the form will not be processed.

This procedure is necessary, says Dr. Marsh, because the Graduation Committee must be able to determine the number of caps and gowns and graduation announcements to order. And it is especially important with regard to ordering diploma covers, due to the school's possible name change being enacted in time for commencement.

At the end of the semester, the student's grades for the semester will be recorded and there will be a final check to ensure that all is in order and that all requirements have been met for graduation.

Then a final transcript indicating that the degree has been conferred will be sent to the advisor, and to the student as well.

Dr. Marsh says that, if possible

## Library Praised

We believe that the Tyler State College Library has one of the best staff of assistants working in any college library.

Anyone who has ever been to another college or university library knows the feeling of apathy that serves as a greeting. Some colleges don't even offer that much help.

It is hard to believe the help one may obtain in our library. Some of the visual aids available in the TSC library are quite sophisticated and to the unfamiliar eye they can be difficult to operate. However, to obtain help with one of these machines, all that is required is a simple request.

The staff is also very helpful when it comes time to select material for research or general studies. In most other libraries you might be pointed in the general direction of the material sought, but not here. An assistant will guide you to the proper area if so desired. Anyone who has used our library could add to this list of examples.

Hopefully, as this institution and the library grow, the service of the staff will not deteriorate.

Compliments to the staff and assistants who work in the TSC library.

By DICK GATLIN

## Lack Of Interest

Various sources around this college have criticized the student body for not being active in school activities outside the classroom.

I think there are several reasons for this lack of enthusiasm on the part of the students in the area of extracurricular activities. Here are the observations I have made:

1. A majority of the students who attend day or night classes at TSC hold full-time jobs which obviously reduce time for other activities.

2. Many students at TSC are married and have children. This, with the first observation above, is a great responsibility that reduces spare time.

3. In colleges where school sponsored activities are successful the age spread among the students is 18-21. I will not mention any ages here but everyone has to agree that TSC has many mature students who do not fit the category above.

This list could go on but that is not the point of this communication. The point is, as we have observed, most of the students attend TSC to better themselves through education. At present, social activities just do not rate a priority in a student body like that at TSC.

Hang in there, critics. In a few short years TSC will have its share of fraternal organizations, social clubs, and service associations to be "actively involved."

By DICK GATLIN

### GRADUATION FROM PAGE 1

sible, the student also will receive a Graduation Evaluation Summary.

Unless all requirements have been fulfilled within two weeks after the end of the semester--including incompletes cleared from previous semesters, grades submitted from the preceding semester and other required, substantiating data--a degree will not be granted.

Should the requirements not be met by that time, the Dean of Admissions and Records will send

a letter notifying the student and his advisor of the requirements outstanding, and stating that the degree will be granted at the end of the following semester providing the necessary requirements are fulfilled by then.

Dr. Marsh emphasizes that, in view of the amount of time and work involved in completing the various procedures and processing the paperwork, the student should not wait until the last minute to try to meet the March 14th deadline, particularly with regard to the difficulty often encountered in trying to see the faculty advisor.

## Who's Who Released

Nineteen Tyler State College students have been elected to Who's Who Among Students in American Universities and Colleges for 1974-75.

Dr. Noel H. McCoy, dean of student life at TSC, has released the honored students' names.

From Tyler are Mrs. Patsy Kay Speir Arms, 1200 Clyde Dr., Earnest Glenne Bass, Rt. 6, Box 326A; Mrs. Rita Casey Colvin, 1722 Barbara; Mrs. Kandas Ann Hedges Dodd, 4701 Ponderosa; Mrs. Linda Goyne Fleet, 3013 Club Lake Dr.

Kenneth Lane Hall, 519 W. 5th; Mrs. Cathy Rowe Myers, 715 S. Kennedy; William Frank Newton, 2114 Hilltop Dr.; Glenn Donald Phillips, 117 W. Phillips; Mrs. Martha Douglas Wheat, 1424 E. Dawson; and Mrs. Helen Brown Whitmill, 406 E. Wells St.

From Gilmer are Mrs. Anita Lee Arrington, Rt. 3, Box 301; and Charles Michael Johnson, Rt. 4, Box 147A.

Mrs. Ann Hightower Benton, Rt. 1, Box 125SH, Malakoff, has also been named to Who's Who.

From Longview are Mrs. Camille Russ Bumpass, Rt. 5, Box 80A, and Jerry Donald Evans, Rt. 5, Box 413, and Donald Keith Huddleston, 1317 9th St.

Mrs. Peggy Craft, 414 Gardner Dr., Palestine, has been named to the honored list.

Soren A. Potz-Nielson II, Rt. 1, Box 489, Henderson, has also received the honor.

## Accounting Loans Down

According to the Texas Society of Certified Public Accountants, applications for student loans in the accounting field are down this year.

The TSCPA, which administers a loan program through its educational foundation, has ample funds at this time for loan purposes for qualified students of accounting.

In 1973, the Texas Society of CPAs Education Foundation administered loans totaling \$47,760 to 55 accounting students in Texas colleges and universities. In 1974, the foundation distributed loans totaling \$22,165 to 24 students, a decline of nearly \$26,000.

Ford Hale, educational foundation president, said that the decline in loan demands was lack of knowledge about the program, rather than lack of need. Hale also said that loans to accounting students ranged up to a maximum of \$45,000.

Estimates by the American Institution of Certified Public Accountants show that demand for accounting graduates for public accounting firms is at an all-time high. This adds to the perplexity of the decline in applications for student aid.

AICPA predicts that demand for new recruits by accounting firms will be as high as 13,500, as a result of economic conditions. A recent figure released by the AICPA substantiates the accuracy of that prediction, showing a six to ten percent increase in demands for new recruits.

The Educational Foundation of TSCPA offers other loan programs also. They will present annual Accounting Excellence Awards to the top graduating seniors in accounting at 36 Texas colleges and universities this spring. Awards of \$1,000 will also be given to five graduate students in accounting for advanced studies in 1975-76.

Dr. John Fletcher congratulating Glenn Bass and Jerry Don Evans, two of the 19 students named to "Who's Who."

## Student Services At TSC

### CONCERT TICKETS

Concert tickets are still available for the asking in Room 110 for Tyler Concert Association productions as well as productions by other area concert associations. Schedules are on posters located outside Room 110, by the information desk and on both bulletin boards upstairs. The tickets are free to TSC students.

Concerts planned for February and March are "Festival Orchestra of Buenos Aires" in Paris and "The New Christie Minstrels" in both Paris and Kilgore. Stephanie Chase will perform for Tyler on March 18. Tyler State College students are urged to take advantage of this offer.

### RESUME SERVICES

The possibility of a resume printing service is being investigated by SGA.

At this point examples of resumes are available in Room 206. Interested students who may need help should contact Dr. Paxton Hart or Dr. Patricia Gajda.

### PART-TIME JOB

A part-time job for students can be obtained from Dr. Noel McCoy in Room 110.

The dean of student life said that several jobs are now open.

More jobs may become available as Tyler State College grows, according to Dr. McCoy.

### GRIPE BOX

Recent complaints from the TSC gripe box have been better GI benefits, clocks in the halls, better food services, not enough "walks" from teachers, postage machine, longer library hours, change machines, unfair check cashing fee, and more chairs in the Student Center.

One of the gripes has already been taken care of by Student Services. The Bookstore is now selling postage stamps for the convenience of Tyler State College students.

The gripe box is sponsored by Student Services and is located by the juke box in the Student Center.

The gripe box is waiting for your suggestions or gripes.

### TENNIS TOURNAMENT

The office of Student Services is planning a tennis tournament if enough interest is shown.

Categories included will be mixed singles and doubles, women's singles and doubles, and men's singles and doubles.

Also, tournaments in ping pong, pool, foosball, and chess are in the planning stages.

Persons interested can sign up in the Student Service Office in Room 206.

The office coordinates student activities, intramural sports, clubs, organizations, and serves as student information center.

### SOUTH CAMPUS LOUNGE

Vending equipment has been installed at the South Campus of Tyler State College.

Cigarettes, cold food, candy, and coffee are among the types of machines that have been installed.

Students are invited to make suggestions about the machines and the services expected. Suggestions should be in writing and signed by the individual.

The items may be forwarded to the Student Government Association. Suggestions will then be grouped by the SGA and forwarded to the business manager.

Orders have been placed for a variety of recreational equipment to be placed in the Student Lounge on the South Campus. The equipment should begin arriving in about 60 days.

### CIRCLE K ACTIVITIES

Circle K, the only service associated organization now on campus at Tyler State College, has announced planned activities for the spring semester.

In response to the recent blood reserve deficit at Stewart Blood Bank of Tyler, Circle K is planning a donor drive at TSC. Tentatively the drive will be sponsored by Circle K, Stewart Blood Bank, and the Sharon Temple Shrine.

A definite date for the drive has not been set; however, the end of February seems likely.

Later in the semester a showing of "Jesus Christ Superstar" will be presented for TSC students and faculty. The tentative date for the presentation is March 14.

# TSC Anticipates Steady, Rapid Growth

By SANDY SCOTT

The history of Tyler State College since it opened just two years ago has been one of rapid growth, and expectations are that it will continue to be so for the next several years.

This was the observation expressed by Dr. James H. Stewart, president of TSC, as he reviewed the school's past and speculated on its future prospects.

The concept of TSC began some 10 years ago with its actual creation coming on June 10, 1971, with the signing of Senate Bill 419 by then Gov. Preston Smith.

According to Dr. Stewart, TSC's classification as an upper-division, co-educational institution is appropriate for this area.

"The concept of the institution--the educational concept--is ideally suited for East Texas, in the area in which we're located. The upper-division concept, that is, teaching at the junior, senior and graduate levels, fits ideally with the large number of junior colleges and junior college students in the junior and community colleges of the area that we have."

Dr. Stewart says TSC's growth has been well-balanced in all academic areas. At present there are some 30 to 40 baccalaureate degree programs and eight graduate degree programs.

During the Fall 1974 semester, 30 to 35 per cent of Tyler State's students were enrolled in graduate level programs.

To help accommodate this segment, two new master's degrees--in business administration and general studies--were developed by the institution's faculty and staff, approved by the regents and submitted to the Coordinating Board, Texas College and University System, where they will be considered for approval in April.

Dr. Stewart said he is optimistic of the approval and both programs should be ready for implementation no later than September 1975, and possibly as early as this summer.

Enrollment at Tyler State has shown significant increases with each registration.

Two years ago, 176 students enrolled in a pilot program of classes in January 1973.

This semester 1,108 are enrolled, representing a 26 per cent increase over the Fall 1974 figure of 874.

"So we're very happy about this," said Dr. Stewart, "and we expect this to continue because of the quality programs that we're offering."

Dr. Stewart not only attributed the increased enrollment to the current programs offered but also said the addition of more programs would meet the needs of still more people, therefore attracting more students.

Another factor contributing to the school's growth has been the faculty, the basic requirement for whom is a doctoral degree.

There are 40 full-time instructors, as well as several part-time instructors from other institutions in the area.

And there are plans to add more.

"We expect to add a minimum of some 18 or 20 new faculty members next September," said Dr. Stewart.

The administration now is involved in seeking funding for the next biennium, and although the final amount has not yet been determined, it is expected the minimum proposed faculty will be added.

"That will make a big difference in our capabilities of offering expanding programs, offering new programs, and therefore attracting more students."

When TSC first opened, the original plan was to stay in the Berta Street facility until the new, permanent campus was ready. But the growth potential wasn't anticipated so a search was begun several months ago for more space.

As a result, 25,000 more square feet were obtained at the Locust Street address--now the South Campus--and where the Business Office and the Education, Psychology and Health and Physical Education Departments are located.

This additional space allowed for the enrollment growth of this spring.

"I think that this is indicative of some very strong factors in our situation," said Dr. Stewart, "that means that we're going to continue this growth for some years to come, actually."

In commenting on the Phase I construction being done on the new campus site at Spur 248 and Omen Road, Dr. Stewart said that moving to the new facilities has been a dream for some three years.

It is estimated that construction will be completed and the buildings ready to be occupied by Summer 1976.

Said Dr. Stewart, "I think that this is going to be one of the most beautiful campuses to be found anywhere, and I know that it will provide an excellent learning environment for the students who... really are the most important people we have around a college campus, certainly around this one."

On the subject of student feedback, Dr. Stewart commented on the questionnaires distributed to students at the end of each term.

He couldn't say all the comments are favorable or positive, "But I think those kinds of comments are made in the light of constructive criticism."

Dr. Stewart said the administration is in agreement with the students regarding many of the things criticized, i.e., the two separate campus facilities. But situations such as these can't be corrected until the move to the new campus.

On the other hand, "... I think most of the comments that we get are very favorable," and with regard to instruction and the faculty, "... these comments are always very positive," and must be considered the most significant.

"We must maintain quality in the classroom," he said, and some of the disadvantages or lack of some facilities or programs are a result of the institution's getting underway so quickly, but

such things as intramural activities will come.

Still, the comments are very helpful.

"But," continued Dr. Stewart, "I would say that the students recognize, generally, some of the handicaps and disadvantages, and they appreciate the fact that we're looking at the priority matters; but they also appreciate the fact that we're trying to get some of these other things going as quickly as possible."

Asked to comment on the most significant event in 1974, Dr. Stewart referred again to the quality of programs offered at TSC and said:

"I think that the mark of that quality came in a very significant way when the Southern Association of Colleges and Schools granted full accreditation to Tyler State College."

He said that this was one of the first orders of business when he came to TSC. And one of the first letters he wrote concerned this matter; and soon after he and the rest of the TSC administration arrived in Tyler, so did representatives from the South-

ern Association. And it was then that a goal was set to achieve full accreditation during the calendar year of TSC's first graduating class. (The first class to graduate from TSC was that of June 1974; full accreditation came the following December.)

Asked if the school has had to face any major problems, Dr. Stewart answered that fortunately there hadn't been any. But what troubles him most--personally--is the knowledge of the many needs which must be met through the Tyler State College program.

"And it just simply is personally troubling to me to know that we are going to have to wait a little while to be able to accomplish some of these things."

In discussing the role of the Board of Regents and his relationship with its members, Dr. Stewart said he felt the board was the finest one with which he has worked.

He elaborated by saying, "These men have gone--and continue to go--far beyond the call of duty as members of the Board of Regents."

The needs of a new institution

require a lot of time and, said Dr. Stewart, the regents have been attentive to their duties in the role of policy-makers and have given him and the staff "the necessary latitude within which to operate to have the kind of institution we all want."

In further comment on the college's development, Dr. Stewart discussed the proposed name change to Texas Eastern University.

He said the regents had been considering the name change for several months and agreed on the new name after receiving information and suggestions from several interested persons, including students.

The change was approved by the regents and submitted to the legislature where it awaits final approval.

The purpose of the name change, according to Dr. Stewart, is to provide the institution with a regional identity.

And since TSC now works with about a dozen junior and community colleges in East Texas, the name Texas Eastern University accomplishes the regional identity being sought.

In looking at 1975, Dr. Stewart said the most significant event would be the groundbreaking on Phase I construction, held Jan. 29.

And in anticipation of 1975 and some five years beyond, he described the period as one of strengthening and developing existing programs and the gradual addition of new ones, as well as faculty.

"The next year," according to Dr. Stewart, "will be a growth period, but it will be more in the direction of strengthening and developing rather than just saying we're going to add a long list of new programs."

Growth in Enrollment at TSC

## TSC Offers Financial Aid To Qualified Individuals

For the first time Tyler State will participate in the Basic Educational Opportunity Grants program.

Unlike loans, grants do not have to be repaid.

Students may apply for the awards for the 1975-76 academic year from now until March 15, 1976, if they did not attend a post-secondary school before April 1, 1973. Exceptions to this may be discussed with Dean of Student Life, Dr. Noel H. McCoy.

Tyler State College offers a wide range of state and federal student financial aid programs available to qualified individuals.

Financial aid is the financing of all or part of a student's post-secondary educational expenses to alleviate financial barriers which prevent access to TSC.

The financing may either be loans, grants or scholarships. Loans are repayable, but grants and scholarships are not.

Qualification for aid is determined according to each financial aid program. The chief factor is family income. That is, the amount of money available from the family that can be applied for educational use. If that amount is less than the cost of attending TSC, then a need for aid exists.

Application for aid is done through the office of the Dean of Student Life.

In applying, the prospective student must obtain and complete a confidential Family Financial Statement (FFS) application.

Students must apply in advance for aid. Priority is given to prospective students who complete their application file for aid by June 1 for the fall semester; Oct. 15 for the spring semester and March 1 for the summer sessions.

Financial aid programs of TSC are the Supplemental Educational Opportunity Grant, a non-repayable grant to the student from the college; National Direct Student Loan, a long-term, low-interest (3 percent) loan from the college; Work/Study, a program of part-time jobs for students;

Federally Insured Student Loan, a long-term, low interest (7 percent) loan from a bank to the student.

Also the Hinson-Hazelwood Loan, a loan program for students who are Texas residents; Law Enforcement Educational Program, a grant program for the student in law enforcement; Tyler State College Scholarship, given to one student from each accredited junior/community college in Texas.

Others include Social Security benefits (the benefits are extended to unmarried children, age 18 to 22, of retired, disabled or deceased workers) Cold War GI Bill, for veterans and members of the armed forces who served more than 180 days of active duty since Jan. 31, 1955, Veterans Administration benefits, for children of deceased veterans.

The Connally-Carillo Act is for students who graduated in the top 25 percent of their high school class and whose family income is less than \$4,800 annually.

Tuition exempted programs are for children of disabled firemen, peace officers, employees

of the Texas Department of Corrections, game wardens, certain blind and deaf persons, high school graduates of state homes, children of prisoners of war or missing in action and firemen enrolled in fire science courses.

## Students Ask For Cap, Gown

Graduating seniors should stop by the College Bookstore at their earliest convenience to make arrangements for cap and gown rental and to order invitations and name cards.

According to A. Wayne Criswell, business manager at Tyler State College, students should fill out the necessary forms even if they are not sure about Spring graduation.

No deposits are required unless students request special engraved name cards for their invitations. No fees will be assessed if the same students decide not to participate in the exercises.

## Courses Offered At Area Cities

Students enrolled for classes at Tyler State College are attending some of those classes in cities other than Tyler. Currently, courses also are being offered in Malakoff, Kilgore and Palestine.

A graduate-level education course in the School of Education and Psychology is being offered by Tyler State College at Malakoff this semester.

"Instructional Improvement in the Secondary School"--EDU 556--is being taught by Dr. Tom G. Turns, associate professor of education at TSC, from 5 p.m. to 7:30 p.m. Thursdays at Malakoff High School.

Another off-campus class being offered this term is MAT 350, "Statistical Methods in Research," being held in the Liberal Arts Building at Kilgore College in Kilgore.

About 20 students are enrolled in the course, taught by Dr. Gerald L. Morris on Mondays from 4 to 6:30 p.m.

The course is designed basically for those persons in the health-related professions.

One other course--"Reading in the Secondary Schools"--is held each Monday afternoon from 4:30 to 7 p.m. at Westwood High School in Palestine.

The EDU 588 course, which stresses remedial reading techniques, is a reading workshop for teachers.

Some 34 students, 99 per cent of whom are degree-holding teachers, are enrolled in the course conducted by Dr. Gary L. Wright, associate professor of education.
