President's Report and Recommendations
October 8th, 1975

University of Texas at Tyler

Follow this and additional works at: https://scholarworks.uttler.edu/bor_docs
1. Health and Physical Education Building

As a matter of information I wish to report that a cost proposal has been requested from the contractor relative to constructing the Health and Physical Education Building and outdoor recreational and athletic facilities. However, prior to finalizing a proposal, the Architect has been requested to review the existing contract documents in an effort to define and correct any and all omissions, errors, and inconsistencies in the plans and specifications including existing interface conditions. It is expected that this cost proposal will be received by December 1, 1975 with an effective date of March 1, 1976. The timing for this proposal is consistent with our plans to construct the Health and Physical Education and outdoor facilities under a revenue bond program.

2. Sanitary Sewer Line

The sanitary waste outfall line serving Texas Eastern University terminates on Spur 248 at the service entrance road to the Power Plant. This line has been installed and capped for tie-in/extension to the City of Tyler waste distribution system.

Presently, the City of Tyler has under contract a sanitary sewer line expansion project. Part of this expansion project will extend a 15" line to serve Texas Eastern University. However, the City of Tyler project terminates approximately 1500 feet from our outfall line as defined above. As a result, the city is currently engineering this service line extension and a cost proposal will be forthcoming. It is anticipated that the city's contractor, John Petty Construction Company, will perform this work as a continuation of the project now underway.

The cost proposal developed by the City of Tyler will be a detailed cost estimate of the job and will require some two or three weeks to finalize. This, of course, is work necessary to connect the university sanitary sewer line with city service.
