Why should I participate?

- Persistent URLs
- Additional access point
- Statistics emailed to authors
- No surrender of copyright
- Discoverability...

http://libguides.brunel.ac.uk/c.php?g=434400&p=2970922
Discoverability

2,219 works with over 122,000 unique downloads
Traditional publication is complicated

- Authors
  - Visibility of work is narrowed
  - Pay for your own work

- Researchers
  - Interlibrary Loan
  - Directly from publisher

- Libraries
  - Cost of journal/database
  - Interlibrary Loan fees

Publication Model

Submit
- Journal Selection
- Submission
- Pre-print

Peer Review
- Blind review
- Waiting

Article Accepted
- Edit for publication
- Post-print

Published!
- Copy-edited and typesetting
- Available through publisher & databases
- Publisher version
All nurse educators continue to seek innovative teaching strategies for their clinical students. In the fall of 2010, our psychiatric/mental health faculty created an alternative meeting area for a clinical conference. Rather than a traditional in-person meeting, students and faculty met in Second Life®. Second Life, a three-dimensional virtual world, provides a unique and flexible medium for faculty interested in a creative approach to learning. Faculty and students can work together in Second Life from anywhere in the world as part of a globally networked virtual classroom environment. Innovative methods of delivering a clinical conference, such as meeting in Second Life, may be a positive learning experience for students and faculty. The purpose of this article is to discuss the students’ and faculty members’ experience with Second Life during a psychiatric mental health clinical conference. A psychiatric mental health faculty member at the University of Texas at Tyler, along with a faculty colleague with Second Life expertise, conducted a clinical conference in Second Life.
OA terminology and resources

**Green Open Access:** Green OA, also called self-archiving, is where authors can post a version of their work into an OA repository, making it freely accessible to everyone. The "version" of the article that can be deposited is dependent on the funder or publisher. For example, the Journal of Nursing Management allows author to deposit their pre-print (1st draft sent to publisher) in their institutional repository, or, the post-print version (final proof/last version before official publication) in their institutional repository—but not the final PDF manuscript. Often, the green OA option comes with particular conditions like an embargo period (usually 12-24 months), requirements to link to the publisher's version, and more.

**Gold Open Access:** Gold OA means that the work (final version) is freely available and accessible to everyone, immediately after publication. A Gold OA option can be achieved by publishing your work in fully open access journals, or in a hybrid model, where a subscription based publisher offers the Gold OA option for a fee.

**Sherpa/RoMEO:** searchable database of publisher policies regarding self-archiving (OA) of journal articles. Includes information on over 22,000 journals.

**Directory of Open Access Journals (DOAJ):** an authoritative directory of academic open access repositories.

**UT Tyler Open Access Strategic Initiative:** Funding portion of article processing fee for faculty, students, and staff who publish in quality OA journals.
What can I add?

- Published articles (where copyright allows)
- Conferences papers, presentations, and posters
- Artworks, musical compositions, audio and video recordings
- Manuscripts
Student scholarship

- Best papers
- Performances
- Undergraduate and graduate research
- Conference posters and presentations
- Special projects
Faculty Profiles: Selected Works

➢ Scholar Works at UT Tyler add-on
➢ Populated through Faculty 180 details
➢ Each profile includes:
  – Full CV
  – Links to your research
  – Courses taught
  – Awards Received
  – Research Interests
