To: Board of Regents, Texas Eastern University

From: James H. Stewart, Jr.

Subject: Administrative Notes

I. Article From the Athens Daily Review

An article from the December 1, 1975 edition of the Athens Daily Review was received in my office recently and a copy is attached for your information. Although I had the information at the time of the Board of Regents meeting last week, I did not feel, as I am sure you will recognize, that it was appropriate to bring it to your attention during the public meeting because of the nature of the material. I have discussed the news story with Regent Neal E. Velvin, who advised me that he did not have additional knowledge about the matter. It is my plan to seek more information concerning the significance of the proposal and, of course, I will inform the board relative to anything I learn about it.

II. Enrollment Report

Unofficial enrollment for the Spring Semester 1976 is 1229. This is an increase of 10.9% over the same period one year ago. Although January 24, 1976 was the 12th class day and the official day for computing enrollment, complete tabulations can not be made until tomorrow. Next week's report to you will include the official enrollment figure which is not expected to vary radically from the 1229 number reported today.

III. Story Concerning Institutional Development

As you will recall, you approved at the December 3, 1975 board meeting the writing of a story concerning the development of Texas Eastern University for use in connection with the opening of our new campus facilities. Dr. Blanche Prejean, whom you approved to work with the institution in compiling this material, has begun accumulating information and a copy of an outline which she prepared prior to a recent visit with me is attached for your information.
IV. **Report from Resident Engineer**

Attached is a report from our director of physical plant and resident engineer for the week ending January 23, 1976.
